cuted at One Time.

Investigation by a special committee nto charges by Senator Watson democrat, Georgia, that American soldiers n France were hanged without court-martial or other trial was order ed today by the Senate by unanimous vote. The committee will be appointed by the President of the Senate, and Senator Watson will be invited before it to produce proof.

"How many senators know." Senator Watson asked, "that a private soldier was frequently shot by his officers because of some complaint against officers' insolence; and that they had gallows upon which men were hanged, day atter day, without court-martial or any other form of trial? I do, and have the photograph of one of those gallows, upon which twenty-one white boys had already been executed at survise when the

Senator Watson replied that he resented the "demand" and would "tell him foot to foot and shoulder to shoulder" that he was "the equal of any senator" and assumed full responsibility for his charges.

He said he would refuse to go before any committee with his evidence or to produce his witnesses unless they were guaranteed immunity.

"I mean every word I said," he added, "and I did not overpaint the picture. I have a photograph of the gallows upon which white soldiers were hanged, and I can produce witnesses who saw it, if it is safe for

Senator Borah then added that without further substantiation he was not willing to bring the matter before the Senate.
Senator Watson said that "numbers" of former service men had told him of the alleged executions, which were conducted, the Georgia senator said, "in a wooded dell, behind one of the camps in France." His informants, Senator Watson said, asserted they had seen the gallows.
Senator Edge, republican, New Jersay, said that Senator Watson "owed it to the country" to produce his eyidence.

Would Rebuild It to Sea Level So That Enemy Could Do No Damage in War.

ON BOARD THE STEAMER LAFAYETTE, November 1 (by Wireless via Paris to the Associated Press) .- Tolls paid by American vessels using the Panama canal could be refunded by the United States Treasury without infringing upon the treaty rights of any nation, according to Lieut. Col. Philippe Bunau-Varilla, chief engineer of the canal under the French regime, who is on his way to the Washington armament conference as a counselor for the French delegation. He thinks these refunds should be from the Treasury, and not from the receipts and surplus of the canal, and he said there was no reason why the Britis: government could not refund tolls paid by vessels in transit from the eastern coast of Canada to the western ports of that country.

Three Treaties Concerned. "I have been looking into the tolls question somewhat," he said, "and question somewhat," he said, "ami I am absolutely convinced that if the American government desires to refund tolls to owners of American vessels it would be within treaty rights. There are three treaties which concern the Panama canal. The first is the treaty of Constantinople regarding the Suez waterway, which guarantees 'treedom and equality of treatment' to ships of all flags. The provisions of that treaty were accepted in the Hay-Pauncefottagreement. The third convention is the Hay-Bunau-Varilla treaty, which I negotiated, giving to the Umited States title to property rights in the the Hay-Bunau-Varilla treaty, when I negotiated, giving to the United States title to property rights in the Panama canal."

The British government is reported to have planned to raise the question of Panama tolls at Washington. In discussing this report Lieut. Col. Bunau-Varilla remarked the Panama canal was an essential part of the Pacific problem.

Subject for Conference "The canal," he added, "is the gateway of the white race into the Pacific, damental which will be settled by the and, in consequence, matters relating nor did any other power make objec-tions. If Russia had constructed and operated the canal she still would have that right to refund tolls. The fact that America operates the canal does not deprive her of the right so long exercised by Russia regarding the Suez canal. Should Great Britain

witnesses might incur some danger, in need no comment on an excuse of that kind. If the senator will not that kind. If the senator will not substantiate his charges, the responsibility is his. I leave the Senate and to all Chairman White.

Surely, you will say, a meeting of the prime ministers of Canada, New Zealand. South Africa. Australia and (Continued on Page 2, Column 2.) pleted within a few years. From my experience as engineer at Panama, I believe the work could be done out of the receipts without the United States Treasury appropriating anything. The receipts now exceed the cost of operation by a sufficient amount to pay the interest on a loan of \$50,000,000, with which work could be begun. The tonnage passing through the canal would increase so rapidly that it would not be unsafe to calculate that they would continue to increase so much each year that o increase so much each year that additional bonds could be issued with additional bonds could be issued with which to continue the construction.

"I need not go into too much technical detail, but I am convinced that by abandoning the railway steam shovel for powerful credges, the cost of a sea-level waterway of sufficient width to be free from interruption would not be excessive."
